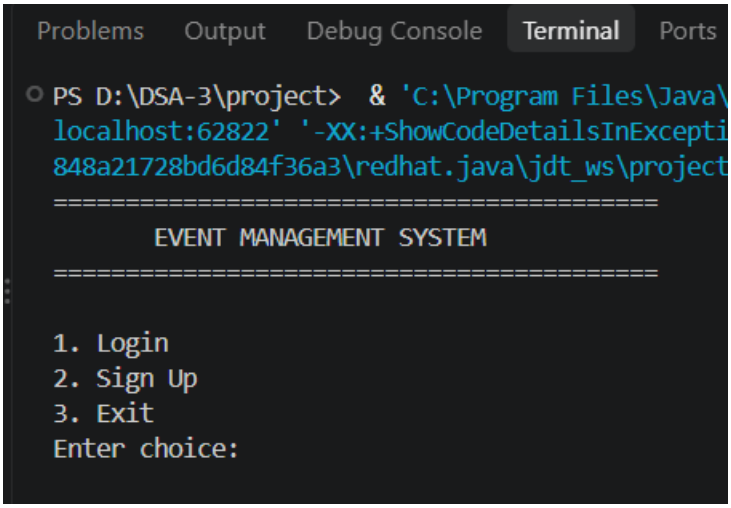

Figure 1: The Event Management System starts and displays the main menu, allowing the user to log in, sign up, or exit the application.

```
========== LOGIN ==========
Username: bhav
Password: 56

Login successful.
Welcome bhav!
Role: Organizer

========================================
          ORGANIZER MENU
========================================
1. Add Event
2. View All Events
3. Search Event using KMP
4. Search Event using Edit Distance
5. View My Events
6. Network Flow - Event Assignment
7. View Participant Feedback
8. Mark Attendance
9. View Attendance
10. Logout
Enter choice:
```

Figure 2: The organizer logs in successfully and the Organizer Menu is displayed with options to add and view events, search events using KMP and Edit Distance, manage assignments, review feedback, and mark attendance.

```
========== ADD EVENT ==========
Enter event name: drawing
Enter event description: creativity
Enter date (DD-MM-YYYY): 20-10-2026
Enter start time (HH:MM): 02:00
Enter end time (HH:MM): 04:00
Enter venue: H401
Enter capacity: 20

Event created successfully.
Event ID: 21
Event file: event21.txt
Day: TUESDAY
```

Figure 3: The organizer enters the event details, including name, description, date, time, venue, and capacity. The system confirms that the event was created successfully and assigns an event ID and file name.

Time       : 10:00 - 15:00
Venue      : Project Hall
Organizer  : Bhavana
Capacity   : 100

----------------------------------------
Event ID   : 20
File       : event20.txt
Name       : Annual Coding Festival
Description: A technical festival featuring coding challenges workshops and project demonstrations
Date       : 23-11-2026
Day        : MONDAY
Time       : 09:00 - 18:00
Venue      : University Grounds
Organizer  : Bhavana
Capacity   : 200

----------------------------------------
Event ID   : 21
File       : event21.txt
Name       : drawing
Description: creativity
Date       : 20-10-2026
Day        : TUESDAY
Time       : 02:00 - 04:00
Venue      : H401
Organizer  : bhav
Capacity   : 20
```

Figure 4: The event listing displays the saved event records and their details, demonstrating that event information is stored and can be viewed later.

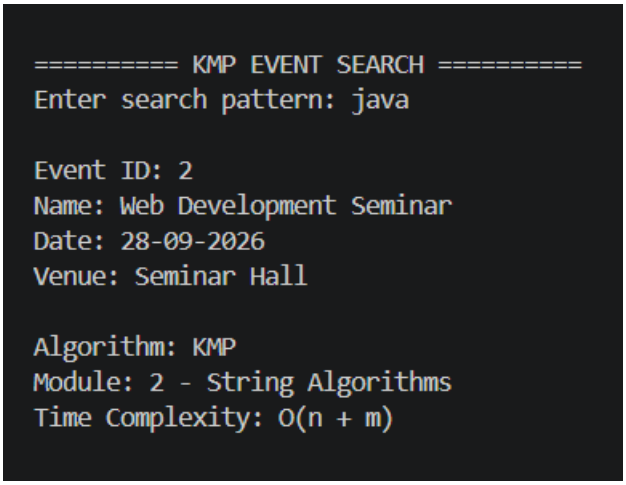

Figure 5: The KMP search finds an event using the entered pattern "java". The matching event details are displayed, along with the algorithm and its time complexity, O(n + m).

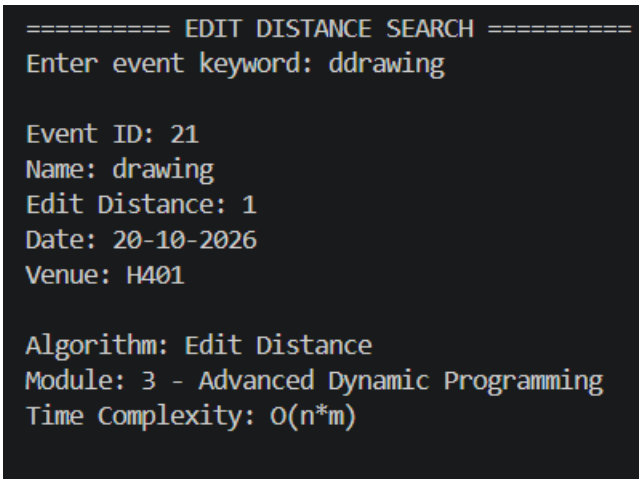

Figure 6: The Edit Distance search matches the keyword "ddrawing" with the event name "drawing" at edit distance 1, demonstrating approximate keyword searching.

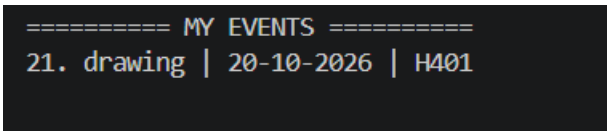

Figure 7: The My Events option lists the organizer's event with its date and venue, confirming that created events can be reviewed.

```
========== NETWORK FLOW ==========
Algorithm: Edmonds-Karp
Network:
Source -> Participants -> Events -> Sink

Maximum Flow = 2
Maximum participant-event assignments calculated.
Venue conflict events analyzed: 10
```

Figure 8: The Edmonds–Karp network-flow module models participant-to-event assignments and calculates a maximum flow of 2, while analyzing venue conflicts across 10 events.

```
========== PARTICIPANT FEEDBACK ==========
Participant: bhavana
Event ID: 1
Event: os
Rating: 4/5
Feedback: good
------------------------------
Participant: bharath
Event ID: 4
Event: Hackathon 2026
Rating: 4/5
Feedback: good
------------------------------
```

Figure 9: The participant feedback screen displays submitted ratings and comments for events, showing that feedback can be recorded and reviewed.

```
----------------------------------------
Enter Event ID: 21

Registered Participants:
- bhavana
Enter participant username: bhavana
Enter status (Present/Absent): present
Attendance saved.
```

Figure 10: The organizer selects an event and records a participant's attendance status as Present. The system confirms that the attendance has been saved.

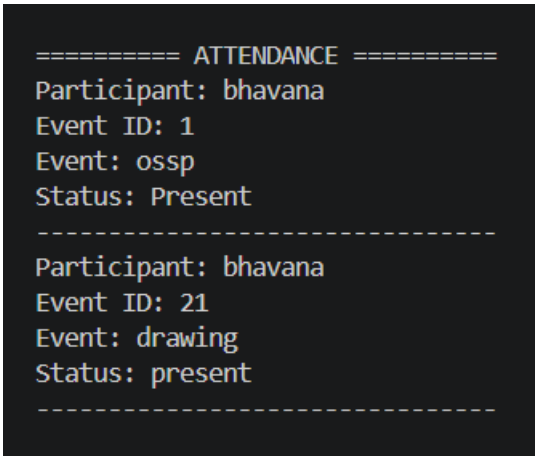

Figure 11: The attendance view lists participants, event IDs, event names, and their recorded statuses, allowing attendance information to be checked.

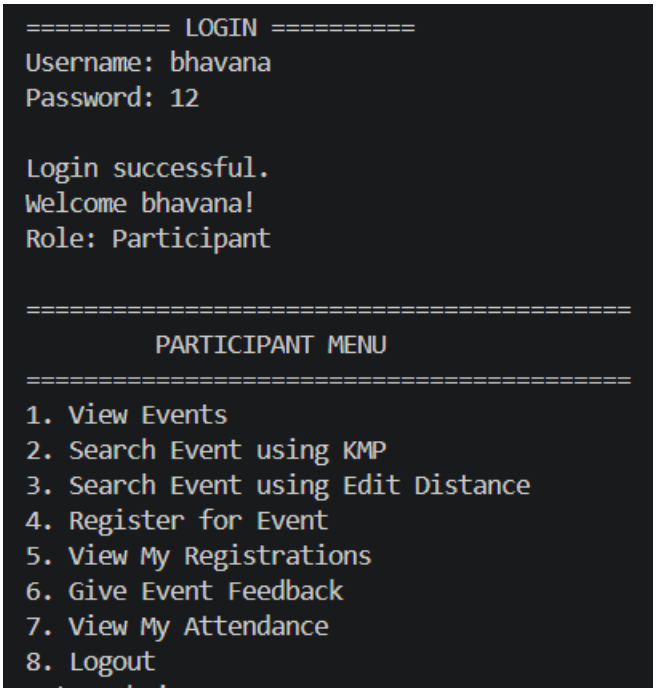

Figure 12: A participant logs in successfully and sees the Participant Menu, which provides options to view and search events, register, give feedback, and check registrations and attendance.

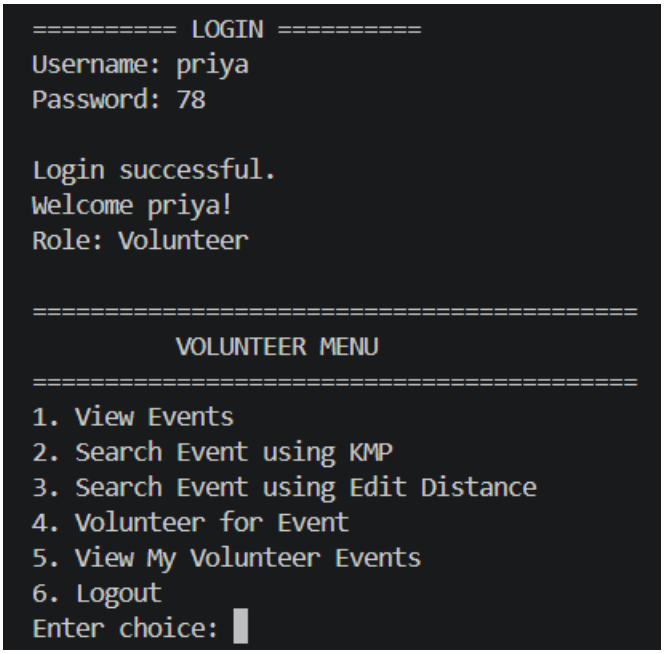

Figure 13: A volunteer logs in successfully and sees the Volunteer Menu, including options to view and search events, volunteer for an event, and view volunteer events.
